

Amendments to the Claims

This listing of claims will replace all prior listings of claims in the application.

Listing of Claims

1. (Original) A resin composition, comprising the following components as essential components:

- (A) a polyol;
- (B) a polyisocyanate; and
- (C) a silane coupling agent containing an imidazole group,

(wherein the ratio NCO/OH of a number of isocyanate groups in the polyisocyanate (B) to a number of hydroxyl groups in the polyol (A) in said composition is from 0.6 to 4.0, and a weight ratio of {(A) + (B)}:(C) is from 100:0.01 to 100:10).

2. (Original) The resin composition according to Claim 1, wherein the polyol (A) is a polyester polyol, an acrylic polyol, a polyether polyol, or a fluoroethylene-containing polyol.

3. (Previously Presented) The resin composition according to Claim 1, wherein the polyisocyanate (B) is toluene diisocyanate (TDI), diphenylmethane-4,4'-diisocyanate (MDI), diphenylmethane-2,4'-diisocyanate, hexamethylene diisocyanate (HDI), bis(4-isocyanatocyclohexyl)methane (H12MDI), isophorone diisocyanate (IPDI), or a derivative obtained by oligomerization of these.

4. (Previously Presented) The resin composition according to Claim 1, wherein the silane coupling agent containing an imidazole group (C) is one that has a hydroxyl group in its molecule, or a derivative thereof.

5. (Previously Presented) A urethane-based paint whose active component is the resin composition according to Claim 1.

6. (Previously Presented) A fluorine-based paint whose active component is the resin composition according to Claim 1.

7. (Previously Presented) A urethane-based adhesive whose active component is the resin composition according to Claim 1.

8. (Previously Presented) A urethane foam whose active component is the resin composition according to Claim 1.

9. (Previously Presented) An elastomer whose active component is the resin composition according to Claim 1.

10. (New) The resin composition according to Claim 1, wherein the silane coupling agent containing an imidazole group (C) is a compound obtained by a reaction of an imidazole compound and 3-glycidoxypropyltrimethoxysilane.
